Fletcher Insulated Racks.

[PATENTED.]

(WITH THREE BENTS.)

Porcelain or Glass insulations can be used.

Owing to even pressure, insulations are not easily broken.

(WITH FOUR BENTS.)

(WITH FIVE BENTS.)

Clamps wires or cables of any size.

Wires or cables of different outside diameters can be used in the same rack.

FLETCHER NESTED RACKS.

The Nested Racks are constructed to receive any desired number and various sizes wires or cables.

The Fletcher Insulated Racks and Nested Racks are patented. For description in detail, see the following pages.

FLETCHER INSULATED RACKS.

The Danals Arc Light Support.

(PATENTED.)

Fig. 1, showing position of Lamp going into suspension.

Fig. 2, showing position while Lamp is at rest.

No. 959. Danals Arc Light Support, including Pulley.....\$1.50.

JOHN R. FLETCHER'S AUTOMATIC SUSPENSION PULLEYS.

The Fletcher Automatic Suspension Pulley is the only device of its kind in which the automatic suspension parts are operated by *gravity*, and is therefore superior to devices of this character which are operated by springs and other unreliable attachments. Pulleys which depend upon grooves cast inside the case work fairly well until the japanning is worn off and the parts become rusty, and after this the "Automatic Suspension" is a thing of the past. The Fletcher Automatic Suspension Pulley is guaranteed to operate perfectly and without interruption, for reason that it is, as heretofore stated, operated by *gravity* only.

No. 950. 90c.

No. 980.

No. 981.

The Cable Clamp shown above is a special patented device which is guaranteed not to **cut** or **champ** the cable to which the pulley is suspended.

The No. 980 Rope Fastner Hooks are those which are used with "No. 950."

No. 981 Rope Fastner Bands are those which are used with the three styles insulated **hooks** shown on the next page.

No. 961 is to be attached to pipes when used with Mast-Arms.

No. 963 has top-clamps for attaching the pulleys to ceilings.

No. 951 is our Traveling Suspension Pulley, which enables the trimmer to remove the lamp from the center of the street to the pole, lower it for trimming, and pull it into suspension again.

No. 942 is the pulley used in connection with No. 951. No. 943 is a Riveted Swivel Pole Pulley, which is suitable for use in connection with all the Automatic Suspension Pulleys made by us.

For description in detail, see the several following pages.

Fletcher's Automatic Suspension Pulleys.

(PATENTED.)

Takes $\frac{1}{2}$ inch rope or $\frac{1}{4}$ inch flexible iron cord.

No. 950 A. 90c.
With plain hook.

No. 949. Cable Clamp. 9c
(Including bolts and nuts.)

This patented device is sent with all Fletcher's Automatic Suspension Pulleys without extra charge.

Fletcher's Automatic Suspension Pulleys.

(PATENTED.)

With Clamps for Gas Pipe.

No. 961-1.	With Clamp to fit 1 inch (inside dia.), 1.315 inch (outside dia.), gas pipe.
" 961-1 $\frac{1}{4}$.	" " 1 $\frac{1}{4}$ " " 1.66 " " "
" 961-1 $\frac{1}{2}$.	" " 1 $\frac{1}{2}$ " " 1.90 " " "

NOTE.—Measurements of iron pipes are always given by inside diameters. Please note this and order No. 961 Pulleys in accordance with our measurements above given.

No. 961.

Overhead Clamp Pulleys.

No. 963 can be placed in any position where overhead suspension is required.

N. B.—Nos. 961 and 963 Suspension Pulleys are same price as those illustrated on pages 14 and 15, and insulating hooks Nos. 982, 983 and 984 will be furnished if desired.

No. 963.

Fletcher's Traveling Suspension Pulleys.

With Automatic Sustaining Device.

(PATENTED.)

The prices named below include a double wheel pole pulley and automatic traveling pulley as shown, and a small center pulley, which makes a complete set.

Draws lamp from center of street and lowers it near pole. Very useful where lamps are suspended over trolley wires.

The Fletcher Safety Windlass.

FLAT BACK.

But this Windlass can not be used on walls; it is designed especially for square poles ONLY.

No. 1042.	Windlass (takes 35 feet $\frac{1}{4}$ inch flexible iron cord)each, \$2 60
" 1043.	Windlass (takes 40 feet $\frac{1}{2}$ inch rope)" 3 00
" 1050.	Handle (or crank) for either of above Windlasses" 50

The Fletcher Safety Windlass.

OCTAGON.

This Windlass designed especially for octagon poles. We must know the size of the facets so as to insure a perfect fit.

No. 1044.	Windlass (takes 35 feet $\frac{1}{4}$ inch flexible iron cord)each, \$2 60
" 1045.	Windlass (takes 40 feet $\frac{1}{2}$ inch rope)" 3 00
" 1050.	Handle (or crank) for either of above Windlasses" 50

The Fletcher Safety Windlasses.

FOR WOOD POLES.

The best and most modern Windlass yet invented. No cumbersome padlock is required, but Windlass is safely locked with key weighing less than half an ounce.

The handle is so arranged that it can not slip off, but is easily removed when not in use.

Only one handle necessary for each trimmer.

No. 1048.	Windlass (takes 35 feet $\frac{1}{4}$ inch flexible iron cord).....	Price each, \$2 60
" 1049.	Windlass (takes 40 feet $\frac{1}{2}$ inch rope)	" 3 00
" 1050.	Handle (or crank) for either of above Windlasses.....	" 50

The Fletcher "Wall" Windlasses.

Nos. 1046 and 1047.

Fletcher Safety "Wall" Windlasses are the only two styles which we make especially for use on walls.

No. 1046.	Wall Windlass, takes 35 feet $\frac{1}{4}$ inch flexible iron cord.....	\$2 60
No. 1047.	Wall Windlass, takes 40 feet $\frac{1}{2}$ inch rope.....	\$3 00
No. 1050.	Handle (or crank) for either of above Windlasses.....	50

The Fletcher Safety "Pole" Windlasses.

Caliper the outside of pole so as to get a perfect fit.

No. 2001. 32c.

Please note remarks below in reference to the No. 2001 and 2002 Fletcher Malleable Break-Arms.

No. 2001 and 2002 Fletcher Malleable Break-Arms are superior to all others by reason of their being re-enforced between the center stem, heads and thimbles. The price being no greater than ordinary gray iron break-arms, is a special inducement for their use.

No. 2002. 30c.

Fletcher's "High Insulation" Break-Arms.

No. 1017. 28c.
Spread 12 in., Arms $4\frac{1}{4}$ in.

No. 1016. 28c.
No. 1016. Fletcher's Reflector Bracket has a spread of 12 inches and uprights $4\frac{1}{4}$ inches.

Nos. 1001, 1031, 1033 and 1034. 32c.

- No. 1001. $1\frac{1}{2}$ in. Thimbles, $1\frac{1}{4}$ in. Stem.
- No. 1031. $1\frac{1}{4}$ in. Thimbles, $1\frac{1}{4}$ in. Stem.
- No. 1033. $1\frac{1}{4}$ in. Thimbles, $1\frac{1}{2}$ in. Stem.
- No. 1034. $1\frac{1}{4}$ in. Thimbles, $1\frac{1}{4}$ in. Stem.

Nos. 1080 and 1081. 32c.
No. 1080. $1\frac{1}{4}$ inch Thimbles.
No. 1081. $1\frac{1}{2}$ inch Thimbles.
(Center openings for $\frac{1}{2}$ inch bolt.)

Nos. 1002 and 1032. 30c.
No. 1002. $1\frac{1}{4}$ inch Stem.
No. 1032. $1\frac{1}{2}$ inch Stem.

No. 1082. Break-Arm. 30c.
(Center opening for $\frac{1}{2}$ inch bolt.)

No. 3004. 60c.

No. 3008. 55c.

No. 3008. Thimble Break-Arm,
24 inch spread, for $1\frac{1}{2}$ inch Pins,
and with $1\frac{1}{2}$ inch center Stem.

No. 3007. Permanent Pin Break-Arm,
24 inch spread, center Pin
for $1\frac{1}{2}$ inch cross-arm hole.

No. 3007. 52c.

No. 3001. $1\frac{1}{2}$ inch Stem and $1\frac{1}{2}$
inch Thimble.

No. 3005. $1\frac{1}{4}$ inch Stem and $1\frac{1}{2}$
inch Thimble.

No. 3001 and 3005. 42c.

No. 3000 and 3003. 45c.
No. 3000. $1\frac{1}{4}$ inch Stem.
No. 3003. $1\frac{1}{2}$ inch Stem.

No. 3006. 56c.
With extra length center Pin.

Several Methods
of
Building Angles in Pole
Lines.

Figure 3 shows angle provided with "Etheridge" pins and insulators. Note the economy in labor and material as compared with Figures 1 and 2; costs less than one-half to build and is immeasurably stronger.

The Etheridge Pin and Insulator

With Standard Insulator.

Cat. No.				
1090.	(Length from shoulder)	3 $\frac{3}{4}$ in.	x 4 $\frac{1}{8}$ in.	50c
1091.	"	"	"	4 $\frac{1}{8}$ in. x 4 $\frac{1}{8}$ in., 52c
1092.	"	"	"	4 $\frac{1}{8}$ in. x 5 $\frac{1}{8}$ in., 56c
1093.	"	"	"	5 $\frac{1}{8}$ in. x 5 $\frac{1}{8}$ in., 58c

Weight of Insulator, 3 $\frac{1}{2}$ lbs.

With Extra Length Petticoat.

Cat. No.				
1095.	(Length from shoulder)	3 $\frac{3}{4}$ x 4 $\frac{1}{8}$ in.	-	56c.
1096.	"	"	"	4 $\frac{1}{8}$ x 4 $\frac{1}{8}$ in. - 58c.
1097.	"	"	"	4 $\frac{1}{8}$ x 5 $\frac{1}{8}$ in. - 62c.
1098.	"	"	"	5 $\frac{1}{8}$ x 5 $\frac{1}{8}$ in. - 64c.

Weight of Insulator, 4 lbs.

Arranged for 1 $\frac{1}{2}$ inch hole in cross arm.

Surface groove of Insulators, 1 $\frac{1}{4}$ inch diameter radius.

No.	Code Words	No.	Code Words

The advent of this device fulfills the long-felt want of electrical engineers and the electrical fraternity in general, of a strong, safe, reliable, and self-locking combination of a pin, insulator, and cross-arm.

The special design of the insulator relieves the porcelain or glass from all "leverage," and subjects it only to the "crushing" force of the line. The *plain* opening in the insulator and *plain* surface of the pin, also, permit an equal distribution of the pressure throughout its length. Being loose and free to turn in either direction, the insulator is thereby relieved from breakage by expansion or contraction, and all undue strain on the pin, insulator, cross-arm, and pole is relieved by its *schieve* characteristic.

This form of pin and insulator permits single arm construction on all *flat* angles of the line, thereby reducing the cost more than 50 per cent.

Troubles from broken pins and insulators have disappeared on lines that have been rebuilt with this form of tube pin and insulator.

OUR CATALOGUE NUMBERS.

In ordering, unless our Catalogue numbers are given, it is *impossible* for us to fill the same correctly. Written descriptions are unnecessary and confusing. Our Catalogue number and the quantity desired is all we require to execute your order intelligently.

THE FLETCHER MANUFACTURING CO.

How Mistakes can be Avoided.

In ordering goods of us, if our customers will use OUR catalogue numbers, mistakes are not possible.

If necessary to order BY WIRE, the use of our Code Words and Telegraph Code is especially recommended, both for economy in cost of messages, and accuracy.
